

Dr. Coman:

Mr. West of the Boy Scouts is anxious for you to look at these examination papers if you have an opportunity between now and Monday morning. I will call for them in your office on Monday morning.

~~W. W. W.~~
Captain Railey.

Capt. Railey:

I have looked over these examinations very carefully - but find nothing in any case that could not be remedied if the man were wanted on the Exp.

A stupid - "big-muscle" boy would be worse than useless. Something else than mere physique must determine the choice.

I would suggest that in Cooper's case "orthostatic-albuminuria" be looked for as an innocent cause of his urinary albumin - and that dental services be suggested to Snell - these two seem the most honest and trustworthy reading between the lines - and Snell probably the better in physique -
Merely my opinion. - F. S. Coman

Transcription of Coman's handwritten response on 1196-4

Capt. Railey:

I have looked over these examinations very carefully – but find nothing in any case that could not be remedied if the man were wanted on the Exp.

A stupid – “big-muscle” boy would be worse than useless. Something else than mere physique must determine the choice.

I would suggest that in Cooper's case “orthostatic- albuminuria” be looked for as an innocent cause of his urinary albumin and that dental services be suggested to Snell- These two seem the most honest and trustworthy reading between the lines – and Snell probably the better in physique.

Merely my opinion!

F.D. Coman
